Healthy Dark Chocolate Home Business Review - For Children's Health

What is more important than your children's health? And as a parent how difficult is it to make sure what your child is eating is healthy? With obesity statistics hitting record highs, we need to think differently on how to provide the healthiest products for our children. This article speaks to this topic and gives just one way to change your thinking about healthy foods. First the facts:

Fewer than 15% of elementary-age kids eat five or more servings of fruits and vegetables daily.

About 25% of all vegetables eaten by elementary students are french fries.

Lastly, the majority of all elementary students eat NO fruit on any given day and the majority eat less than one serving of vegetables a day.

Are you reading this in shock? Probably not, but I would guess the majority really don't know what to do to fix this problem. Where do we start to change this? We all know what our kids refuse to eat, right? Is there a real life solution to getting our children to eat there spinach? Luckily there is. One way is through a dark healthy chocolate made exclusively by a MXI Corp in Reno Nevada. Here are the facts:

MXI has a unique line of dark Healthy Chocolates called Xocai that kids love to eat yet it contains antioxidants that help improve your children's concentration, memory, mood, and dental health. It also delivers a wide array of nutrients these growing bodies need.

A daily supply of one of these dark chocolates is the equivalent to your child eating 13 lbs of tomatoes or 7 lbs of spinach.

So you might be saying why don't you just go to the local grocery store and get some dark chocolate from there? Unfortunately the chocolate that's available today in stores do not contain the same amount of antioxidants and health benefits because it is heat processed. And when chocolate is heat processed it loses about 80% of the antioxidants. Not to mention the fact that these chocolates are loaded with sugars, fillers and preservatives.

Xocai chocolate comes in 7 different healthy chocolates to choose from. And Xocai chocolates do not contain waxes, sugars, fillers or preservatives. The dark healthy chocolate is made only with all natural products and is diabetic and vegan friendly.

Finally, as a parent, you now have a healthy alternative to chocolate chip cookies or Oreos. So when your child craves something sweet, by giving them dark healthy chocolate, its like giving them a plate full of spinach. What could be better?

To learn more about Brice Orrell, visit his Xocai website.

Brice Orrell and his Team of Top Internet Marketers specialize in hands-on training for those who desire a home-based business. His focus is on building a team of like minded entrepreneurs who value healthy living and are dedicated to achieving their goals in life.
