Don't Step Over The Line

Follow the leader stay in the lines what will people think of what you've done this time? Go with the crowd surely somebody knows why were all wearing the emperors clothes play it safe or by the rules or don't play at all, What if you lose? If you value your efforts you got the freedom to chose that's not the secret but I know what is everybody dies but not everyone lives. I'm gonna ride like I got the police on my tail gonna live my life like I'm out on bail gonna be out front gonna blaze a trail I'm gonna be sure your the first to know I'm gonna cross that line. Everybody freeze don't step over the line don't stand up they'll shoot down the first one who tries try to change the world they'll think your outta your mind revolutions start when someone crosses the line they want us to lay down, Give in to the lie nothing has to change and no one has to die that's not the secret but I know what is everybody dies but not everyone lives.
