We have all heard of the mystery of the Russian princess, Anastasia. Although the truth about her disappearance was hidden from the world for 73 years, many rumors had been spread during that time. Many believed that Anastasia and her grandmother had escaped and fled to Paris, as shown in the 1997 Fox film "Anastasia". Some believed that she died with her family, but none of these were proven to be true. So what really happened to her? Did she escape or did she die on that fateful day in July? Only time can tell.

Anastasia Nicholaievna Romanov was born on June 18, 1901 to Nicholas II, the last Czar of imperial Russia and Empress Alexandra. Anastasia was the fourth child born into the family, she had three older sisters Olga, Tatiana, and Maria; she also had a little brother named Alexei.
