Inside D.O.F

Get inside the story

Fiona was a Great Warrior from the planet of Gaia. In her time the planet was unified. The continent of Ishmar was filled with people whose life was studying the mystical arts it was like a religion to them. The Continent of Vale was a land of scientist almost every man living there was an inventor or scientist of some kind. Together they developed machines and weapons, of unbelievable power and capabilities. Small groups of people thought with these weapons and machines they could rule over the planet. Fiona was loyal to her roots in Vale thought like most of her people thought, that was respecting the planet and holding honor and glory to heart. Giving back to the planet as she gives to us, with this in her heart she learned of the groups plotting. She fought to save the planet meeting one person along her travel with the heart to sacrifice everything for nothing. This person was Granpa Balmunk, together they seized many of these powerful weapons and machines. With them they defeated nearly all these evil groups in till one man emerged, Chretien (Cher-ee-ten). He had also gotten his hands on many weapons and machines, his sorcerers ability was rivaled by little already. Chretien fighting to enslave Gaia, Fiona and Granpa Balmunk fighting to keep it the way it sat, free and united. In the climax of the battle defeating Chretien Fiona unleashed all the power of the weapons and the machines her body began to fade into blue mist. Waking up in a Realm with only a castle the castle had a room with a thousand Galaxies as little holograms, understand what her had to do almost immediately. She became the Goddess of balance insuring all worlds respect the planets, living free and unified.
