# Stupidity and Intelligence

*What is the difference between being stupid and not being intelligent?*

Being stupid is a matter of choice, but intelligence.. you either have it or not.

*So you choose to be stupid?* She asked me with a confused voice.

No, itâs not like that, itâs just that the things that you choose can make you appear stupid, you can be a very intelligent creature, yet make bad decisions.

*Bad? For who?*

inconvenient decisions, like giving priority to your desires ignoring the warning signals you are receiving from your mind.
